

11 - 13 October 2019

Gisborne Tairāwhiti

Welcome to the joint 2019 conference of Historic Places Aotearoa and ICOMOS NZ

"The Heritage of Change"

New Zealand Aotearoa has seen much change in its history of human occupation. People have periodically arrived by sea, and in later times by air, and have modified and adapted the land to their lifestyle.

Change brings tension, as people are forced to confront new ideas or technology. The reasons for these changes and their impacts are varied.

2019 marks a significant anniversary for the people of Tairāwhiti, being 250 years since Cook made contact with Aotearoa. This landmark event triggered huge change nothing would ever be the same for the people on both sides of the exchange.

This event and how it is interpreted has itself been the subject of much change over recent decades – older stories have given way to more enlightened and thoughtful approaches.

Change continues to evolve in the heritage sector: change in information available, change in technology, change in professional practice and philosophy. These changes affect what we do, how we do it and most importantly why we do it.

The joint conference between HPA and ICOMOS NZ will explore many of these changes and their impacts and implications.

Programme overview
