

Is it a bird? Is it a rocket?

**No, it's ...**

# THE PEOPLE'S STEEPLE mega model!

Lift-off is in

**CATHEDRAL**  
27 August, this  
**SUNDAY** at  
**11am**  
**SQUARE**

The People's steeple is brainchild of Marcus Brandt, US timber and masonry heritage expert. His concept is about earthquake strength [timber steeple construction] and community building: up to 500 people working 16 capstans to lift the steeple as key part of the cathedral reinstatement.

Marcus and helpers recently constructed the mega model, 1/7<sup>th</sup> actual steeple size.

**Be inspired:** come and join in the fun and excitement as the mega model People's Steeple lifts off on Sunday. The kids and you will be able to haul away on a capstan and help raise the spire!

**11am this Sunday 27 August**  
**in front of Christchurch Cathedral**

# An exciting event for kids of all ages!

Marcus, mayor and councillors – and little kids – having fun with the mini-model recently at Ara. In the background mega model under construction.
