

GOOD NEWS ABOUT CHRIST CHURCH CATHEDRAL

- It is now agreed by experts advising both the church and restoration advocates the Cathedral can be safely restored to the highest seismic code for public buildings.
- Full restoration will cost about **\$67 million** (not the escalated \$220 million figure created by a delayed start of 15 years).
- The Great Christchurch Buildings Trust has **offered to fund immediate stabilisation** & make-safe work – which will achieve 34% of seismic code, and prepare the Cathedral for full restoration to 100% of code.
- The GCB Trust has offered to cover the entire \$6-7 million cost of initial stabilisation work – which could be completed in one year
- This **work can start immediately** with full restoration **finished in 5-7 years**.
- Restoration can be achieved with **no cost to the church** - other than its insurance payouts.
- GCB Trust and others have offered to help **raise all funds required** above the Church's insurance payouts.
- There is local, national and international support amongst construction companies, restoration experts, engineers, consultants and fund raisers, who are **ready and willing to work** to ensure restoration is achieved by the most timely and cost effective process.

**WE ASK THE CHURCH TO EMBRACE THESE OFFERS
TO HELP IT RESTORE THE CATHEDRAL.**

**RESTORATION OF THE CATHEDRAL IS THE MOST
IMPORTANT ANCHOR PROJECT FOR THE RECOVERY
OF CHRISTCHURCH.**

**WE CAN WORK TOGETHER AND RESTORE
OUR CITY'S CATHEDRAL!**
